

Zagreb, centre

Residential development zone

The whole project is written only in Croatian language, so we are providing only essential information. Translation is being done and will be available for further reading.

There are over 25.000sqm of building area in one of the most beautiful and sought after parts of Zagreb city. As this is an exclusive area, it is not possible to develop high density buildings with small apartments, but higher quality luxurious apartments. About 400BRP on 600-1000sqm land plot will be built.

Area is designated as a residential S zone and partially a M mixed residential/business zone.

The property is located about three kilometers from the very centre of the town, as You can see on the first picture on the right. The thicker circle marks Jelacic Square and the larger circle is the property for development.
